☐ City Life vs. Village Life

☐ Continuous technological and economical development in modern world
☐ created great differences between cities, a difference that is clearly visible
☐ in the size of various cities. From cities with more than 20 million
☐ people. This diversities in cities allowed for more ~~that~~ ~~to be~~ difference in
☐ people's preferences for where to live. For me, I prefer to live in bigger cities
☐ than in small ones, this personal attitude is the result of many factors.

☐ First of all, I find the excitement of big cities to be attractive, living in a
☐ dynamic environment can turn into a very rich experience that sharpens one's
☐ personality and open one's eyes on the real world. Life in big cities give one
☐ new challenges every day, let it be deciding which restaurant to go to or
☐ deciding which company to work for. ~~For me~~ For me, this lifestyle is very attractive
☐ and is considered a huge advantage of big cities compared with the constant,
☐ slow paced life styles of small towns.

☐ Furthermore, it's undeniable that the economic power of a country is driven
☐ by its big cities and the majority of wealth and finance is centered and controlled
☐ in big cities. With this kind of power big cities offer more opportunities
☐ for one's career advancements and a more chances of higher income than
☐ small towns does, and higher income can be the basis of a happier, healthier life.

☐ Finally, although I prefer to live in a big city, I can not help but assure
☐ that this is a matter of personal taste. To be clear, I would love to
☐ spend some days in countryside to recharge my soul and relieve
☐ myself from daily stress.
